Making the world a cleaner place is not hard to do and it is the right thing to do...
recognized by Energy Star use high efficient compressors, improved insulation and more precise temperature and defrost mechanisms to improve energy efficiency.

Secondly DAI Scientific manufacturers recycle all scrap metal not used in the finished product. They extend the recycling program to include the packaging material used when shipping product to various clients across the United States and around the world.

Some of DAI Scientific Manufacturers are based in various countries in Europe and are subject to the European Union Waste Electrical and Electronic Equipment Directive (WEEE). WEEE is a Producer Responsibility Directive aimed at reducing the waste from electrical equipment, increasing recovery and recycling rates of WEEE and improving environmental performance of all operators involved in the life cycle of electrical and electronic equipment. The directive specifies that, as of August 13, 2005, manufacturers of specified electronic equipment will be obliged to take back those products at the end of their useful life…DAI Scientific Equipment manufacturers Based in Europe that comply with WEEE will take back any of their branded product sold in the EU as of August 13, 2005. To see more about Energy Star and WEEE please go to www.energystar.gov and www.bmglabtech.com.

As scientific research grows and we learn more about how to continue to improve our environment DAI Scientific Equipment manufacturers will grow and improve as well. Our manufacturers produce solutions for the world for a world economy. We all live here as neighbors and as good neighbors it is up to us to maintain our property not only for the good of the research community but for the good of the world.
