Quarterly Independent Third-party Audit of Travel Program Prices

July - September 2026

Methodology of Price Audit

- The audit is conducted by an independent third-party, comparing prices available through Pitt's Travel Program to outside booking tools by analyzing airfare/car rental searches using:
  - Concur online booking tool that works in conjunction with Anthony Travel, Pitt's contracted Travel Management Company
  - Direct booking through provider (i.e., airline or rental agency)
  - One consolidator site (Expedia, Orbitz, etc.)
- Audit searches utilized top destinations for Pitt travel:
  - 10 city pairs for flights (7 domestic, 3 international)
  - 10 domestic cities for car rental (except December 2022)

Methodology Price Audit

- Controls for the audit sample, included:
  - The number of trip days were aligned for each city pair search. On average, trips were booked approximately 21 days in advance. In some cases, there were airline-specific contract benefits included for booking 7 days or less in advance
  - Timeframe of search is aligned across airfares and car search is aligned with flight selected
  - Each fare search is conducted simultaneously across sites to ensure the date/time of the actual search is consistent.
  - Airfare class is "Economy" for domestic / “Business Class” for international and verified as aligned (same for comparable flight)
  - Car rental class utilized is Mid-Size / Intermediate
